

HOW TO DETERMINE AN IMAGE'S SIZE AND DIMENSIONS *On a PC or Mac computer.*

On a PC Computer

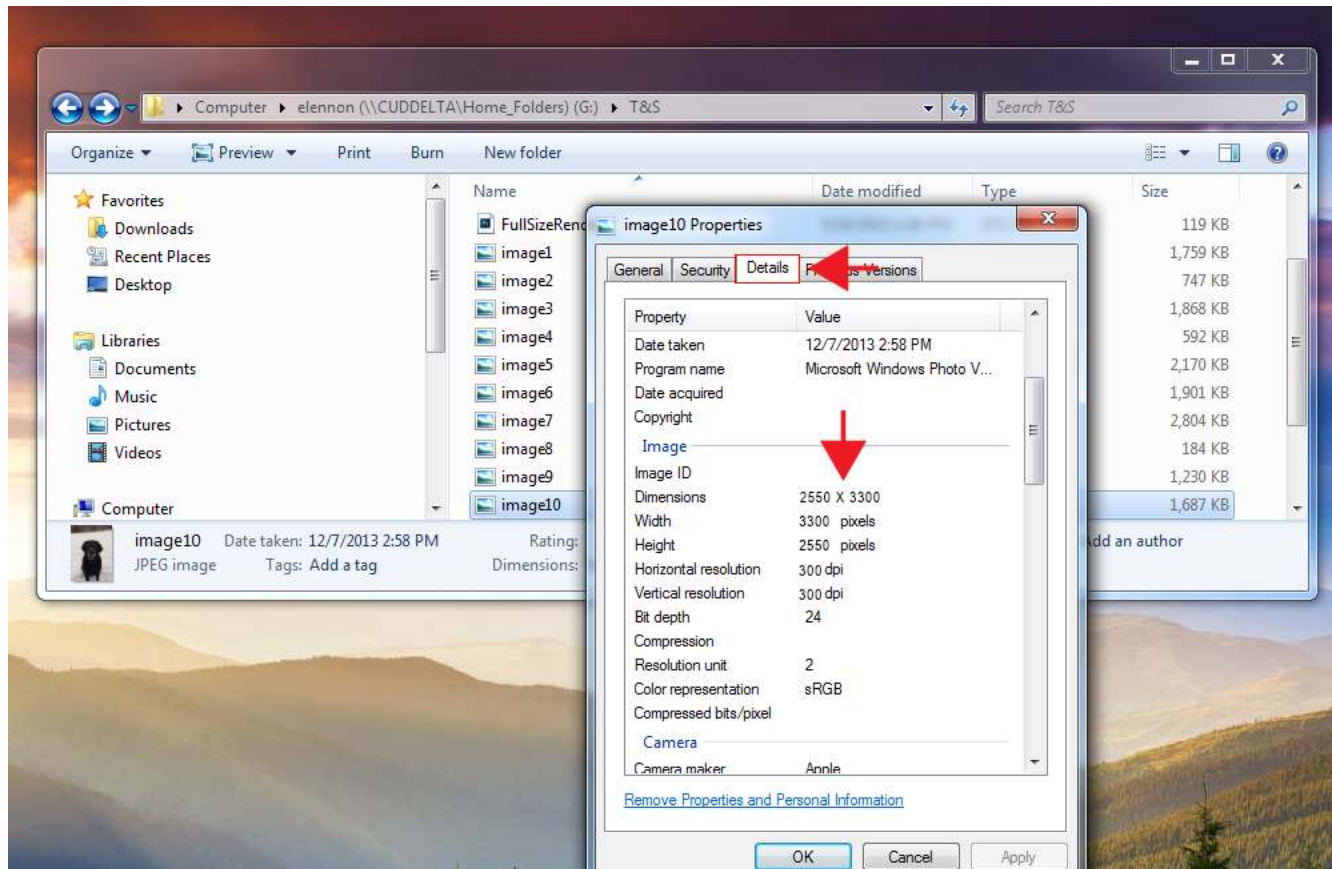

1. Open the file where the image is saved.

2. Place your cursor over the image icon, and right-click.
3. Choose Properties.

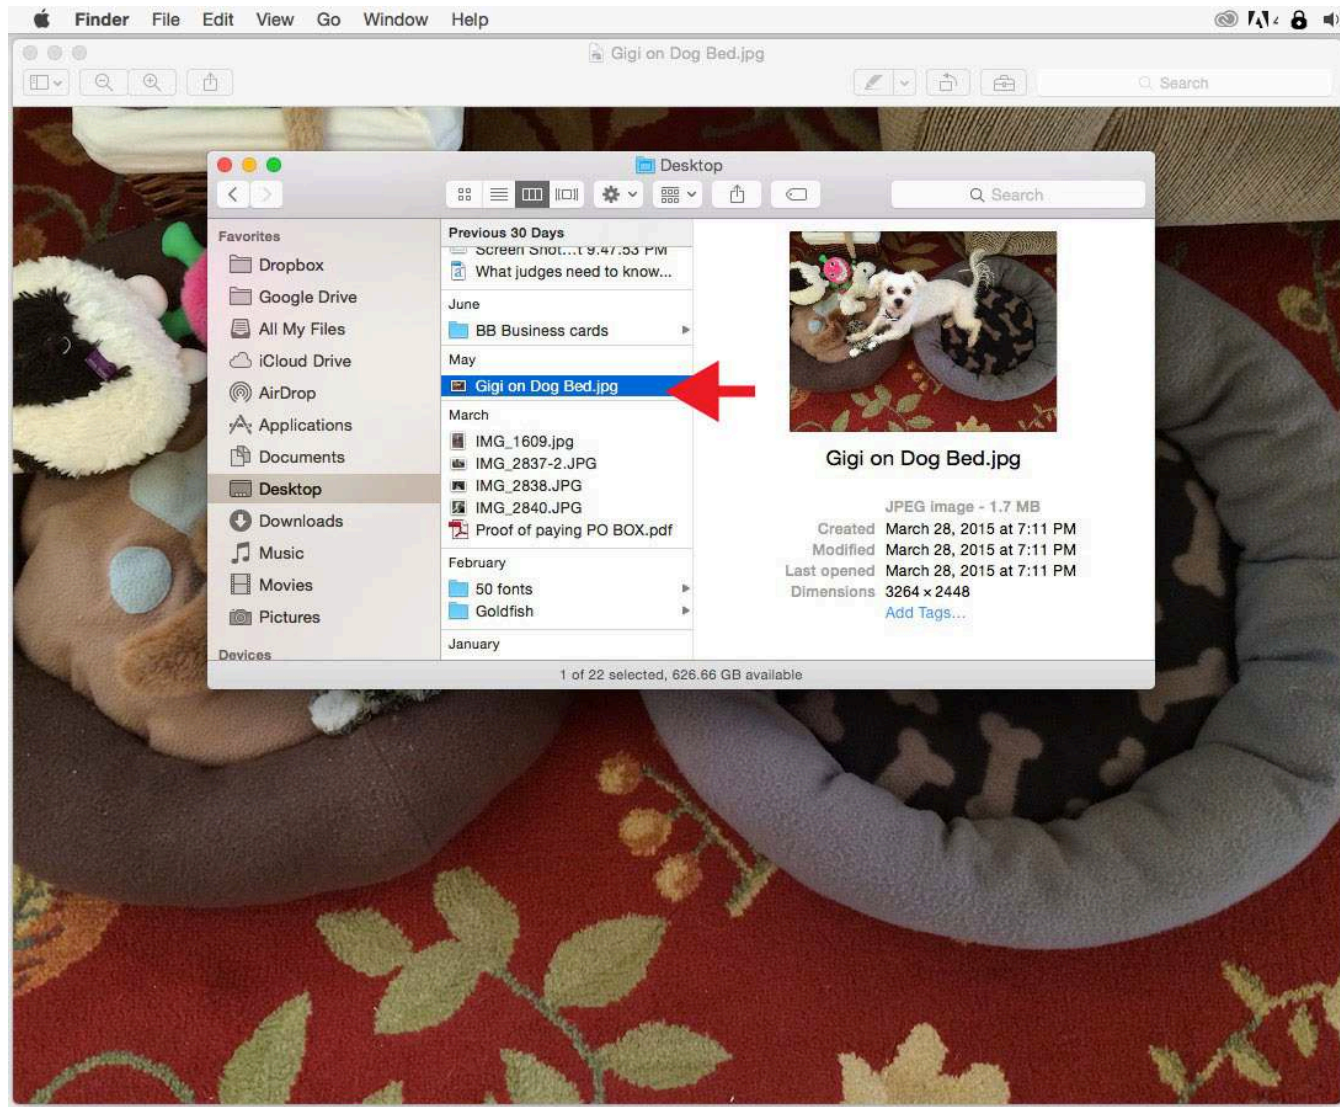

4. Click the Details tab.
5. Scroll down to the:
 - Image section - To view the image dimensions.
 - File section - To view the image file size.

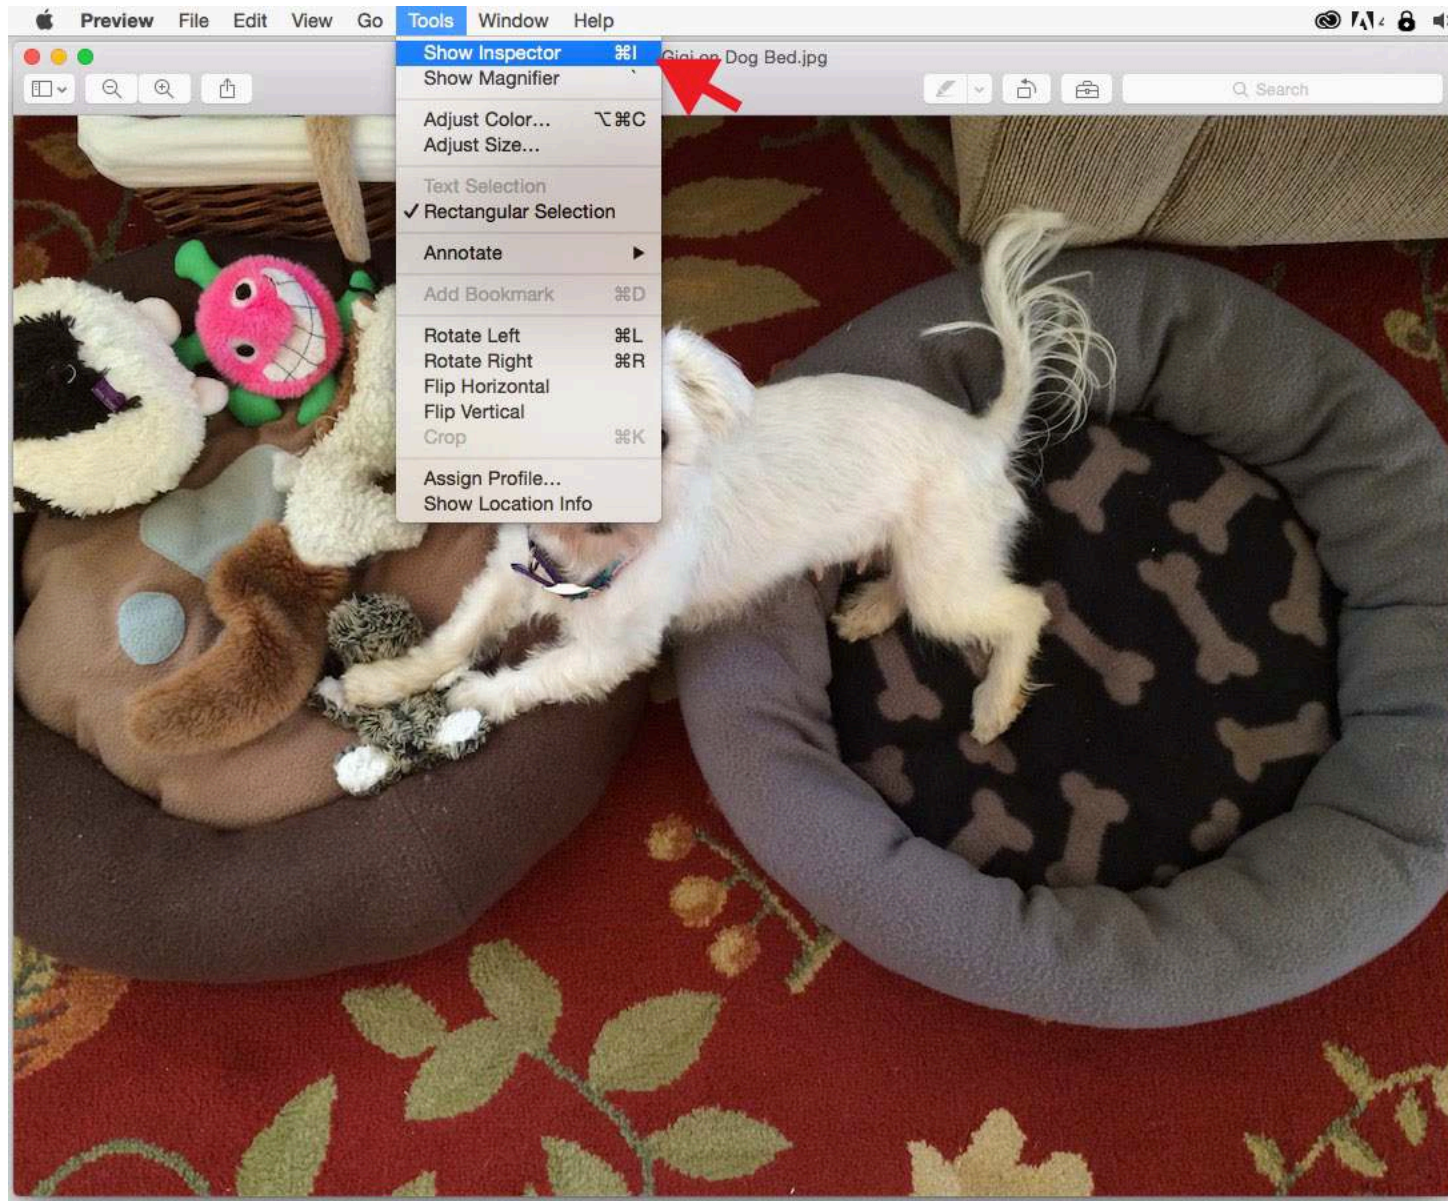

On a Mac Computer

1. Navigate and open the file where the image is saved.

2. Open the image in *Preview*, by double clicking on the image file or by short key *Command + O*.
3. In *Preview*, select *Tools* in the top navigation bar, select *Show Inspector* or by short key *Command + I*.

4. A box titled *General Info* will appear, in that box will be the *Image Size* and *Image DPI* information needed.
